Efforts undertaken during the year to reduce the volume and toxicity of waste generated:

Whyco Finishing Technologies, LLC exited the cyanide plating business in November 2009 and finished cleaning all of the cyanide containing tanks and storage areas in 2010. The remainder of the cyanide liquid was shipped off site in January 2010.

Changes in volume and toxicity of waste actually achieved during the year in comparison to previous years:

The total weight generated of wet PC filtered sludge (from 2009 to 2010) was reduced by approximately 63%. The total weight of cyanide wastes (from 2009 to 2010) increased by approximately 8%. Chromium and Lead solids (from 2009 to 2010) was reduced by approximately 97%.

Certification

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment.
